

Upper Southeast Salt Creek Sub-Basin Sewers – Phase 3

Lincoln Wastewater System (LWWS) proposes to extend the wastewater service area to provide for additional growth in the quickly expanding southern portion of Lincoln. The Upper SE Salt Creek Sub-Basin Sewers will convey flows from urban development areas S-2 and S-3.

The project is divided into three phases for construction. Phase 3 commences with a connection to the Upper SE Salt Creek Sub-Basin Sewer-Phase 1 at approximately South 36th Street north of Rokeby Road and extends east along the existing drainage channel east of South 40th Street (see attached map).

Coordination meetings have been held with the City of Lincoln Planning Department, Lincoln Water System, Watershed Management, Lower Platte South Natural Resources District, Engineering Services, Parks and Recreation Department, and private utilities in the project area. A public meeting was held on April 12, 2005 at the Walt Branch Library to present the project.

Final design of the sewer was completed in April 2006. Bidding and construction of the sewer is expected to occur in 2006-2007.

Project Summary -

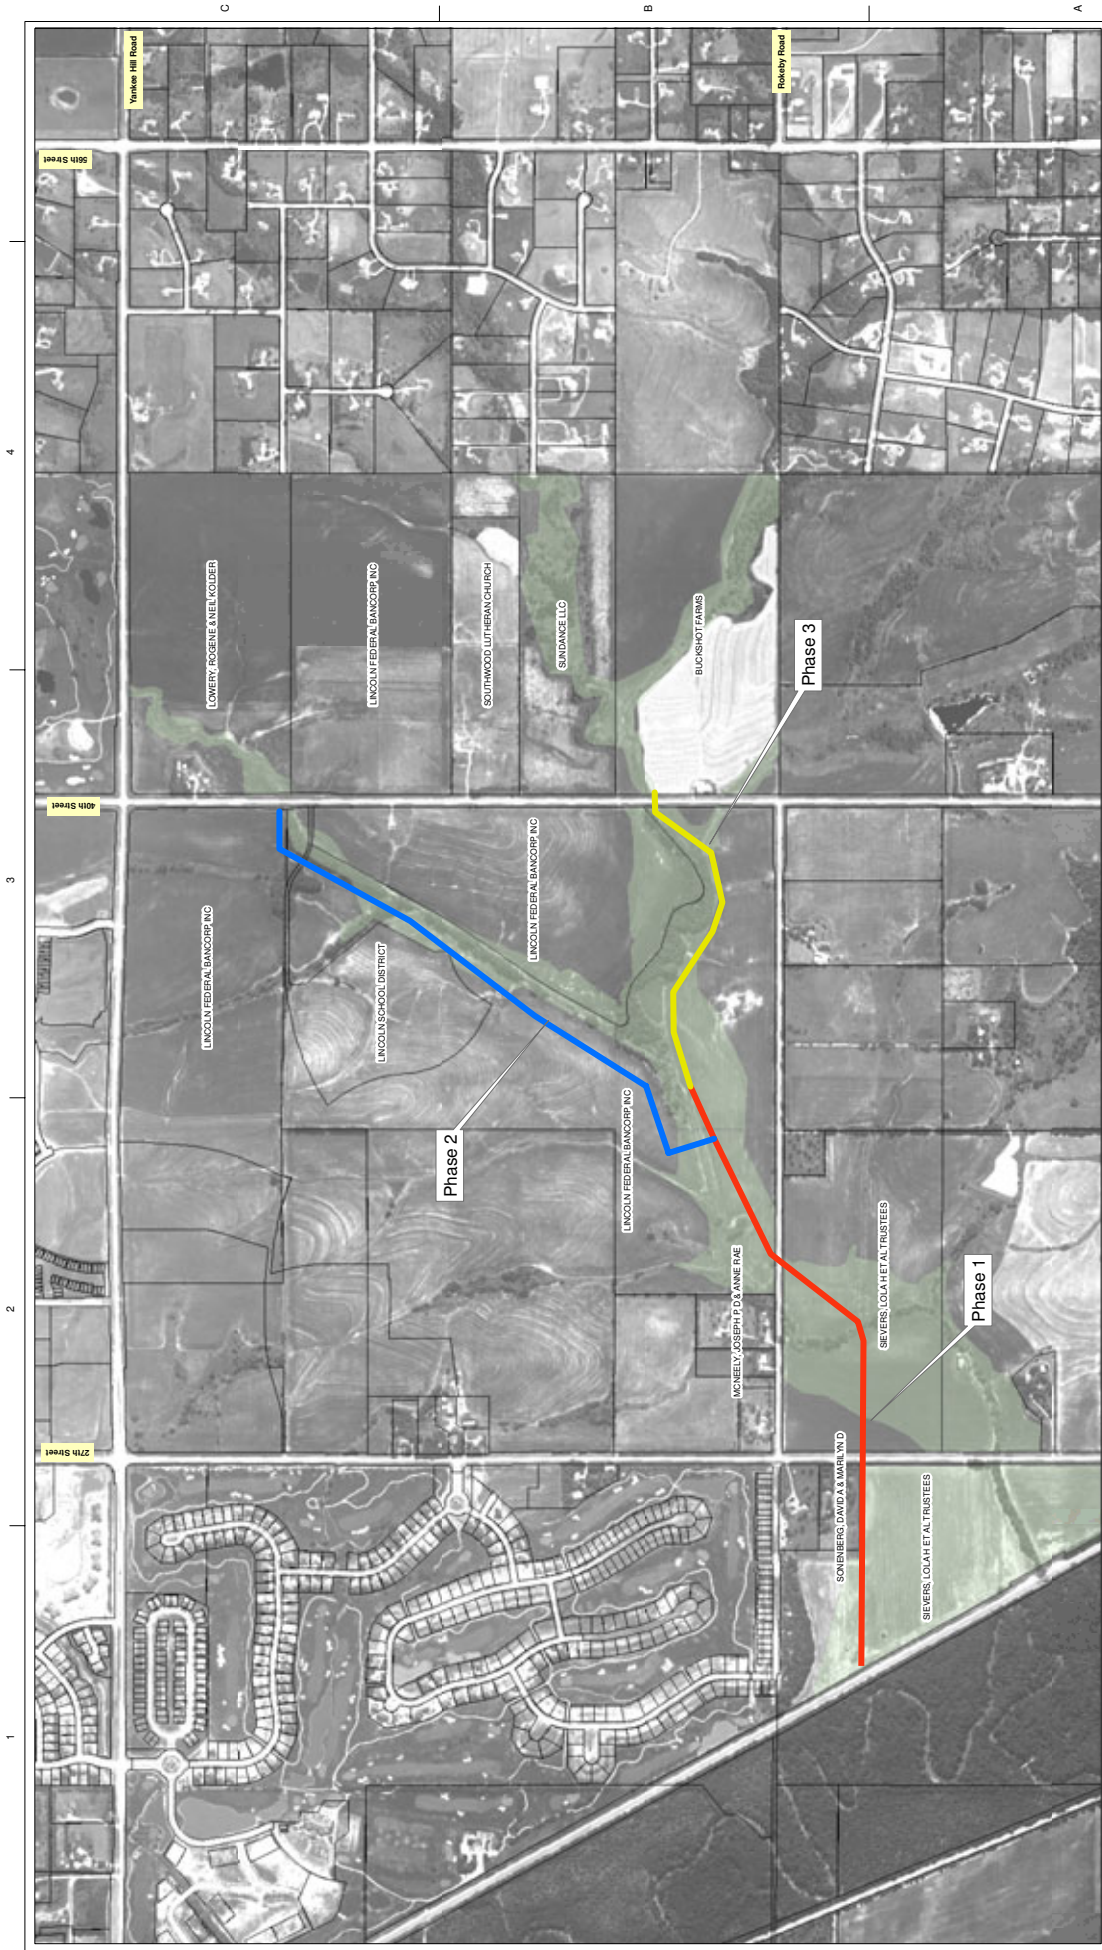

Project Information:	Phase 3 – 2,599 LF 21” Sewer, 10 LF 12” Sewer, Bored Crossing of South 40th Street
Opinion of Probable Construction Cost:	\$612,000 (Based on 70% Design)

Project Schedule -

Phase 3 Bid Date	To Be Determined
Phase 3 Substantial Completion	150 calendar days
Phase 3 Final Completion	180 calendar days
